Research CLI — 系统架构 · Agent 请求数据流

Terminal UI → core orchestration & routing → tools / MCP / research modules → model providers

主数据流　虚线框 = 架构分区
回退 / 反馈　盒内 = 模块 + 职责

CLI FRONTEND · packages/cli

Interactive TUI
research.tsx · sessions

Commands
mcp · skills · hooks

ACP
acpSession.ts

CORE ORCHESTRATION · packages/core

Context & Memory
config.ts · memory.ts

modelRouterService
provider selection

Routing Strategy
default · classifier · approval

TOOLS & INTEGRATIONS

Workspace Tools
filesystem · shell

MCP
external service adapters

Research Modules
writing · bibliography · analysis

SDK / A2A / VS Code
embedded clients

tool result loop

MODEL PROVIDERS · provider config

Gemini / Vertex
hosted models

OpenAI / Anthropic
hosted models

Baidu / DeepSeek / Qwen
hosted models

RESULT STREAM

Tool Results
structured observations

Assistant Response
streamed to terminal

主链：prompt → packages/cli → packages/core router → provider / tools → structured result → terminal。
